

# Tremeur DENIGOT

I am working in the JRC where I am responsible for the communication in the Task force which deals with the EU participation to Expo Milano 2015.

I was previously working in the DGT promoting multilingualism in particular for young people via a translation contest called Juvenes Translatores. I have also been working as social media expert promoting collaborative ways of working.

Before this I have been working as a history teacher for many years in International and European schools where I have been staff representative for 8 years. I am speaking fluently French, English and Italian.

My priorities are the improvement of working conditions under a more collaborative and horizontal way of working taking full advantage of everyone's skill and aptitudes by empowering staff and promoting networking. Too many barriers and limits of all sorts are weakening our organisation. I would also focus on contract agent's status and European Schools.
