

Olivier Brunet

Factory inspector in France from 1980 to 1989 fully immersed in working environment, negotiation and conflicts solving,

I have been working in five DGs of the EC over the last twenty five years including one in the USA and two in Spain in the frame of an exchange of civil servants

I dream of a stronger Europe and a more innovative European Commission eager to learn from the best practices from Member States

I believe in an active social dialogue stimulating the motivation of a high qualified staff thanks to a more open and less hierarchical organization

I would like to contribute to a more clever mobility frame and a better balance between work and private life requiring a smarter use of our talents

I am a positive thinker and team player sharing the U4U values
